Soal

23.
$$x = t$$
, $y = \frac{1}{1+t^2}$, $z = t^2$

Jawab : Semua bilangan real memenuhi persamaan sehingga didapat grafik

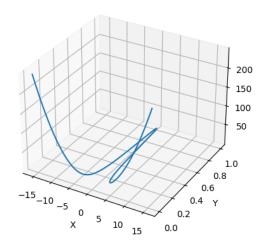

Figure 1: No. 23

27. Show that the curve with parametric equations $x = t \cos t$, $y = t \sin t$, z = t lies on the cone $z^2 = x^2 + y^2$, and use this fact to help sketch the curve.

Jawab: Semua bilangan real memenuhi persamaan sehingga didapat grafik, Didapat bahwa persamaan parametrik berada pada permukaan kerucut

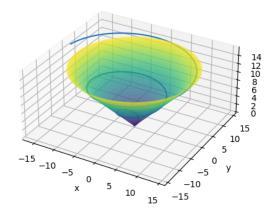

Figure 2: No. 27

- 31 35 Use a computer to graph the curve with the given vector equation. Make sure you choose a parameter domain and viewpoint that reveal the true natur of the curve.
 - 31. $r(t) = \langle \cos t \sin 2t, \sin t \sin 2t, \cos 2t \rangle$

Jawab: Semua bilangan real memenuhi persamaan sehingga didapat grafik

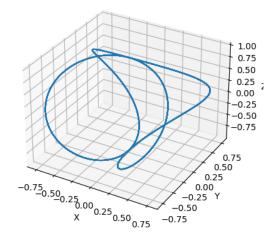

Figure 3: No. 31

32.
$$r(t) = \langle t^2, \ln t, t \rangle$$

Jawab: Karena terdapat $\ln\,t$ dimana t
 tidak boleh negatif maka domainnya adalah t>0sehingga didapat grafik

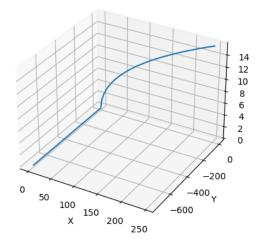

Figure 4: No. 32

33.
$$r(t) = \langle t, t \sin t, t \cos t \rangle$$

Jawab: Semua bilangan real memenuhi persamaan sehingga didapat grafik dan berbentuk seperti 2 kerucut horizontal yang saling berlawanan arah

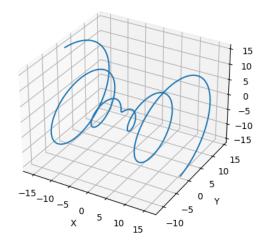

Figure 5: No. 33

34.
$$r(t) = \langle t, e^t, \cos t \rangle$$

Jawab: Semua bilangan real memenuhi persamaan sehingga didapat grafik.

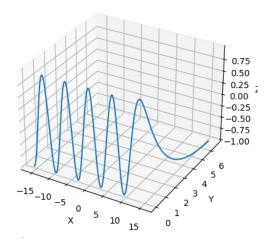

Figure 6: No. 34

35.
$$r(t) = \langle \cos 2t, \cos 3t, \cos 4t \rangle$$

Jawab: Semua bilangan real memenuhi persamaan sehingga didapat grafik

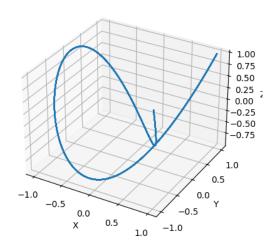

Figure 7: No. 35

36. Graph the curve with parametric equations $x = \sin t, y = \sin 2t, z = \cos 3t$. Explain its shape by graphing its projections onto the three coordinate planes.

Jawab: Semua bilangan real memenuhi persamaan sehingga didapat grafik, Lalu didapat juga proyeksi pada tiga bidang koordinat untuk lebih jelas dalam mengetahui bentuknya

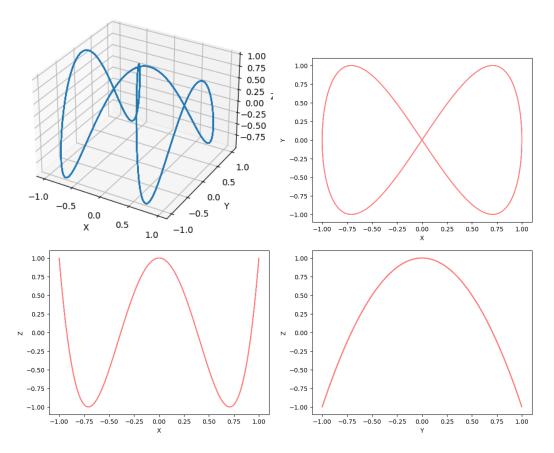

Figure 8: No. 36

37. Graph the curve with parametric equations

$$x = (1 + \cos 16t) \cos t$$
$$y = (1 + \cos 16t) \sin t$$
$$z = 1 + \cos 16t$$

Explain the appearance of the graph by showing that it lies on a cone

Jawab: Semua bilangan real memenuhi persamaan sehingga didapat grafik, Lalu juga didapat bahwa persamaan parametrik tersebut terlihat seperti gelombang pada permukaan kerucut.

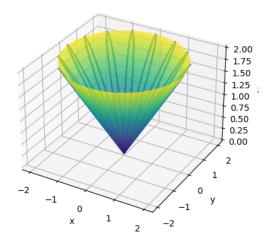

Figure 9: No. 37

38. Graph the curve with parametric equations

$$x = \sqrt{1 - 0.25 \cos^2 t} \cos t$$
$$y = \sqrt{1 - 0.25 \cos^2 t} \sin t$$
$$z = 0.5 \cos 10t$$

Explain the appearance of the graph by showing that it lies on a sphere.

Jawab: Semua bilangan real memenuhi persamaan sehingga didapat grafik, Lalu didapat seperti gelombang pada permukaan bola. Bola didapat dengan plotting Bola dengan pusat (0,0) dan jari jari 1

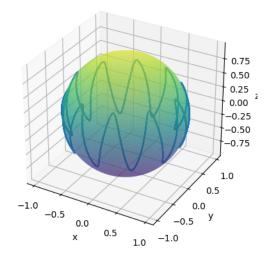

Figure 10: No. 38

41. The cone $z = \sqrt{x^2 + y^2}$ and the plane z = 1 + y

Jawab: Semua bilangan real memenuhi persamaan sehingga didapat grafik, dan diketahui bahwa bidang z=1+y memotong kerucut $z=\sqrt{x^2+y^2}$

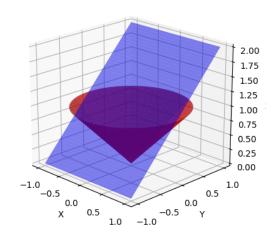

Figure 11: No. 41

45. Try to sketch by hand the curve of intersection of the circular cylinder $x^2 + y^2 = 4$ and the parabolic cylinder $z = x^2$. The find parametric equation for this curve and use these equations and a computer to graph the curve.

Jawab: Semua bilangan real memenuhi persamaan. Lalu didapat persamaan parametriknya

$$x^2 + y^2 = 4$$
$$z = x^2$$

maka

$$x = 2 \cos t$$

$$y = 2 \sin t$$

$$z = x^{2}$$

$$= (2 \cos t)^{2}$$

$$= 4 \cos^{2} t$$

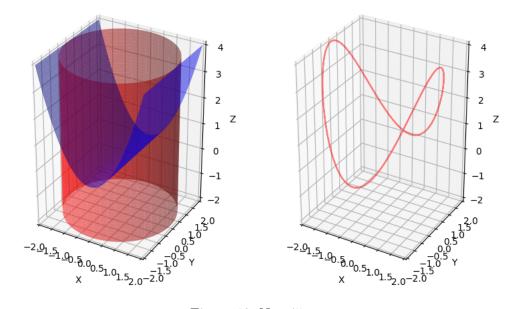

Figure 12: No. 45

46. Try to sketch by hand the curve of intersection of the parabolic cylinder $y = x^2$ and the top half of the ellipsoid $x^2 + 4y^2 + 4z^2 = 16$. Then find parametric equations for this curve and use these equations and a computer to graph the curve.

Jawab: Semua bilangan real memenuhi persamaan. Lalu didapat persamaan parametriknya

$$y = x^2$$
$$x^2 + 4y^2 + 4z^2 = 16$$

maka

$$x = t$$

$$y = t^{2}$$

$$4z^{2} = 16 - x^{2} - 4y^{2}$$

$$z^{2} = 4 - \frac{x^{2}}{4} - y^{2}$$

$$z = \sqrt{4 - \frac{x^{2}}{4} - y^{2}}$$

$$z = \sqrt{4 - \frac{t^{2}}{4} - t^{4}}$$

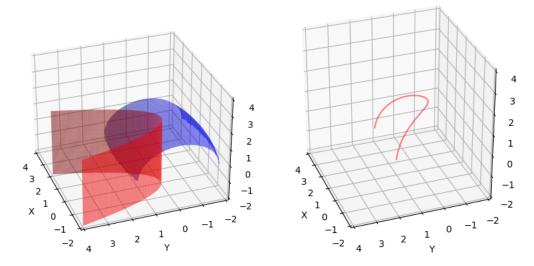

Figure 13: No. 46

50. The view of the trefoil knot shown in Figure 8 is accurate, but it doesn't reveal the whole story. Use the parametric equations

$$x = (2 + \cos 1.5t) \cos t$$
$$y = (2 + \cos 1.5t) \sin t$$
$$z = \sin 1.5t$$

to sketch the curve by hand as viewed from above, with gaps indicating where the curve passes over itself. Start by showing that the projection of the curve onto the xy-plane has polar coordinates $r=2+\cos 1.5t$ and $\theta=t$, so r varies between 1 and 3. Then show that z has maximum and minimum values when the projection is halfway between r=1 and r=3. When you have finished your sketch, use a computer to draw the curve with viewpoint directly above and compare with your sketch. Then use the computer to draw the curve from several other viewpoints. You can get a better impression of the curve if you plot a tube with radius 0.2 around the curve. (Use the tubeplot command in Maple or the tubecurve or Tube command in Mathematica.)

Jawab: Semua bilangan real memenuhi persamaan. Grafik dan proyeksinya terhadap ke tiga bidang adalah

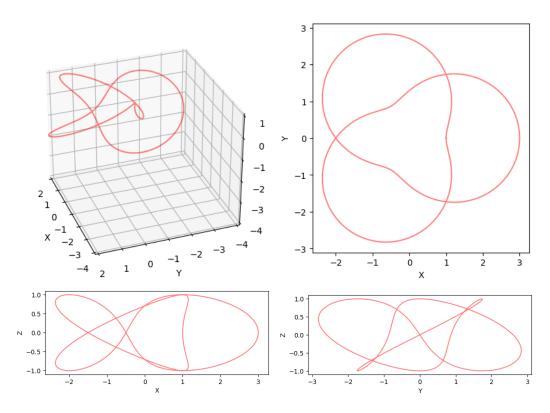

Figure 14: No. 50

didapat bahwa proyeksi pada bidang xylebih menunjukkan bentuk sebenarnya dari fungsi parametrik tersebut.
